

## LISTING OF THE CLAIMS

1. (Currently Amended) A glaucoma treatment kit, comprising:  
an implant comprising:  
an outflow portion sized and shaped to be received within  
Schlemm's canal of an eye; and  
an inflow portion in fluid communication with the outflow portion,  
the inflow portion configured to be disposed in the anterior chamber of the  
eye;  
~~wherein a long axis of the inflow portion is disposed at an angle to a long  
axis of the outflow portion; and~~  
an applicator configured (i) to releasably hold the implant and (ii) to be  
introduced into the anterior chamber for implantation into eye tissue, the  
applicator comprising a tube, ~~wherein the tube releasably holds at least part of the  
implant;~~  
wherein a long axis of the inflow portion is disposed at an angle to a long  
axis of the outflow portion when the implant is releasably held by the applicator.
2. (Currently Amended) The glaucoma treatment kit of Claim 1, wherein the  
implant comprises a tube that releasably holds at least part of the inflow portion of the implant.
3. (Original) The glaucoma treatment kit of Claim 1, wherein the implant is  
substantially L-shaped.
